

REXENER[®] HEAT PUMP

The ultimate replacement solution for
the spa electric heater down to -10°C

Control through a wifi
connection

Remote touch screen

Full inverter technology

EVI technology

Ideal extreme climates

Reversible hot/cold

High water temperatures 38 °C

Compatible with swim spas

EVI HEAT PUMP 7 KW

Air 26°C Water 26°C Hygro 70°C	Output power	2,70 ~ 7,20 kW
	Power consumption	0,19 ~ 1,16 kW
	COP	14,35 ~ 6,20

Air -10°C Water 38°C Hygro 70°C	Output power	1,26 ~ 3,10 kW
	Power consumption	0,39 ~ 1,50 kW
	COP	3,23 ~ 2,06

Air 15°C Water 38°C Hygro 70°C	Output power	1,85 ~ 5,67 kW
	Power consumption	0,31 ~ 1,76 kW
	COP	5,94 ~ 3,23

Operating range	-25°C to 40°C
Optimum flow (m³/h)	2
Dimensions (cm)	63,2 x 46,8 x 47,4
Noise level at 10 m (dB)	<32 dB
Hydraulic connections (mm)	1 1/2" male / Ø32 - Ø38
Operating modes	Heating / Cooling / Auto / Silent / Boost
Warranty	2 years

Full inverter technology

The Full inverter technology offers maximum efficiency. By automatically adjusting the power in real time, it guarantees substantial energy savings, continuous comfort and increased durability. Opt for the Full inverter, and transform your energy use into an optimal experience. The compressor modulates its power according to heating needs.

- + Less energy consuming
- + More precise temperature control
- + 25% more economical than an on/off heat pump

EVI technology

Operates down to -25°C

EVI – Enhanced Vapour Injection – improves the energy efficiency of water heat pump systems by injecting additional vapor into the compressor at low ambient temperatures. It is thanks to this innovative technology that the EVI SPA heat pump is able to **perform in more in extreme weather conditions.**

4 OPERATING MODES

• Automatic

For more comfort, your heat pump will reach and maintain the required temperature by selecting automatically the operation mode heating or cooling.

• Boost

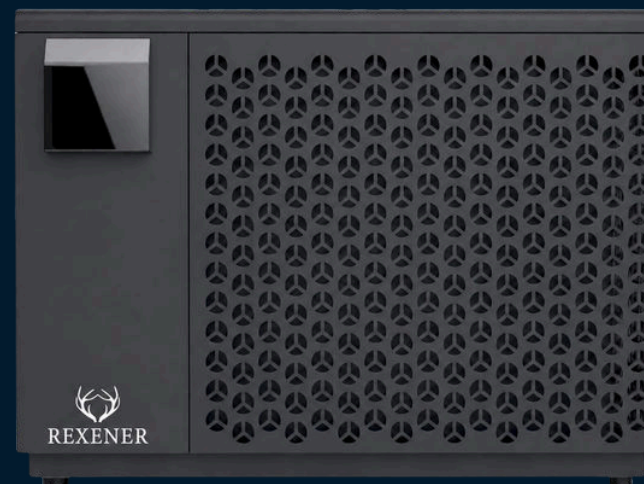

In order to reach the set temperature, activate boost mode and save heating.

• Silent / Eco

Silent mode allows your heat pump to operate at energy efficient and quieter, with idle speed to maintain water temperature when the weather conditions are optimal.

• Heating / Cooling

Simply choose the desired mode in order to achieve the desired temperature.

Reversible Hot Cold

Water temperature
From 10 to 40°C

HEATING

COOLING

INTERGRATED WIFI

Your connected heat pump can be controlled remotely, as you wish, using the Smartlife app.

- + Remote control: operating mode, temperature...
- + Scheduling of the next session
- + Use without accessing the heat pump control panel

EASY TO CONNECT

PLUG AND PLAY

The EVI Spa is simply plug and play.

ULTRA COMPACT

4" control screen

Strong structure
